

MEMOLUB®

EM

**SINGLE-POINT LUBRICATOR
FOR THE LUBRICATION OF ELECTRIC MOTORS**

OUR OFFER

ADVANCED

Its patented pump system avoid grease separation problems. The strokes are produced at regular intervals at an ejection pressure as high as 10 bar with a limited volume as low as 0,15cc per day.

SIMPLE

A unique screwing part, the Memo is used to set the lubrication program, allowing the cartridge to empty in 12 or 24 months. Replacing the cartridge is an easy and quick operation with no risk of changing the frequency setting and thus avoiding human errors.

VERSATILE

Beside electric motors, MEMOLUB® EM is particularly suited for the lubrication of points that require a limited quantity of lubricant over long periods of time, conveyors, fans, pumps, etc.

YOUR ADVANTAGES

ECOLOGICAL

The lubricant cartridge (made of recyclable polymer) and the battery pack are the only consumables needed to have the units work for years and years. The environmental impact is minimal. The MEMOLUB® lubricant cartridges reduce lubricant consumption and protect your production equipment.

SAFE

MEMOLUB® EM can be installed up to 2 m from the lube point. Remote installation eliminates dangerous access of critical points and lubrication personnel can work safely.

ECONOMICAL

Replacing a cartridge takes less than 60 seconds! MEMOLUB® EM ensures constant greasing, avoiding machine shutdown for lubrication tasks.

Specifications

Cartridge capacity :	120 cc	Average daily output per day :	0,15 or 0,30 cc
Dimensions :	115 x 101 mm	Connections :	1/4 inch R
Battery pack :	4,5 V Alkaline	Lubricants :	Greases up to grade NLGI 2
Min. working temperature :	-10° C	Max. ejection pressure :	10 bar
Temperature exposure range :	-25° C to +50° C	Warranty :	3 years
Settings :	12 or 24 months		

INTERNATIONALLY LEADING PRODUCTS

MEMOLUB International develops, manufactures and markets lubrication systems. The exceptional reliability and high efficiency of MEMOLUB® products have been recognised and appreciated by the industry for more than twenty years. Present in over 50 countries, we provide a reliable lubrication solution.
